

SCHÖNENBERGER

**WE MOVE YOUR MATTRESS COVERS –
AND YOUR PRODUCTIVITY
TO THE NEXT LEVEL!**

A SCHÖNENBERGER SYSTEM OFFERS INNOVATIVE, FLEXIBLE TRANSPORT & LOGISTICS SOLUTIONS – FULLY BENEFIT FROM IT ACROSS YOUR MATTRESS MANUFACTURING PROCESS.

Working hours of your employees are too valuable for non-value adding activities such as sorting, moving floor trolleys from one station to the other or searching for mattress covers. Our hanging systems make use of the space above – for the transport of individual components as well as for an intermediate buffer.

Intelligent monitoring, full traceability and integrated sorting optimize your work flow by eliminating manual transport and search times. Your benefit: Significant increase in productivity, improved quality and ergonomic working conditions.

MORE SPACE, ORDER AND CLEANLINESS

Make use of the space above for clean and gentle transport and the intermediate storage of your mattress covers. SCHÖNENBERGER systems are mounted in a space-saving manner above production lines. Additional floor space for value-adding works is made available.

NO SEARCH TIMES

Trolleys move the covers in correct sequence at exactly the right time to the required mattress core for assembly. Annoying and time-consuming search for the needed cover is eliminated.

ERGONOMIC WORKING CONDITIONS

SCHÖNENBERGER systems automatically convey semi-finished and finished covers between the various work stations – physically demanding tasks are prevented. Not only the operator's workload is reduced, your profitability is increased at the same time.

WELL-ORGANIZED WORK

Each trolley has its individual barcode or RFID chip and can be tracked and traced from the start of the manufacturing chain to the end, including your warehouse. Mattress covers don't get lost any longer. Monitoring of material flow is made possible due to integrated sorting systems – essential for a just-in-sequence-production and -delivery.

DATA TRANSPARENCY

SCHÖNENBERGER systems make production management easier. Make use of the won data for your inhouse data management, e .g. as basis for your permanent inventory. Data exchange with your ERP system is of course possible.

SIMPLE, FLEXIBLE EXPANSION

We intelligently handle your system expansion if manufacturing volumes have grown. Thanks to our modular and flexible construction additional floor space is made available.

**DURABLE
SYSTEMS
MADE IN GERMANY**

SCHÖNENBERGER systems are designed for carrying heavy loads and energy efficient operation. Their functional construction together with the use of high-quality components ensure that maintenance costs and other unexpected costs are kept at a minimum. Your benefit: Low total Cost of Ownership thanks to a high level of system availability and extremely low running costs.

ILS 2100 FOR SMALL LOT SIZES

- transport of individual items and intelligent product traceability
- high throughputs and fast sorting performance
- just-in-Sequence production

OMNIFLO FOR SERIAL PRODUCTION

- perfectly adaptable to complex building structures
- medium to large lots
- transport of 3 – 6 covers in larger batches on a long trolley

SCHÖNENBERGER

SCHÖNENBERGER SYSTEMS

looks back on more than 40 years of expertise in the development, planning, sales and assembly of transport & intralogistics solutions. With its roots in garment production the range of applications rapidly has expanded to sectors such as textile logistics, automotive industry and other industries. System components, trolleys and control systems can flexibly be adjusted to the customer's individual requirements. Our global network of distribution and service partners ensures international support and assistance. Until today more than 2.500 systems have been installed across many countries in the world. SCHÖNENBERGER stands for excellent quality. Schönenberger transport systems have a long life expectancy, a high availability and yet very low service and maintenance costs. Our customers confirm: SCHÖNENBERGER systems optimize the in-house work flow by eliminating non-value adding activities. Our customers' benefit: process improvements and increased productivity!
